

Chapmans in the 1860 Vermont Census

Data extracted by Irene Miller.
Computer input by Judy Jefferson.

Arranged by county, township, page, house, and family.

For most subjects the age is expressed in years immediately after the sex entry. In some cases - particularly with infants - the age is expressed in months in which case the age column is blank. When the age is expressed in months it is in the next seldom used column immediately after age.

Birthplace is shown with the approved postal abbreviations for states in the U.S.
Foreign places, when applicable, were abbreviated as follows: PR = Portugal BV = Bavaria, CD = Canada, EN = England, HN = Hanover, IR = Ireland, SW = Sweden, WG = Wurtenburg
FR = France, GM = Germany, etc.

Color is shown after the birthplace (BP). It is assumed to be white unless otherwise specified.

S = in school this year, M = married this year, R = can't read.

The following is the data arrangement by columns and is a general format not exact.
